Data Sheet

Access Zips

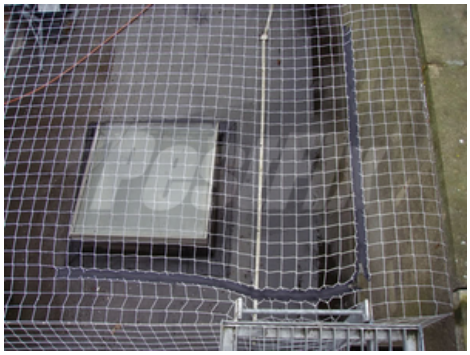

Bird netting access zips provide a practical way to create access points within installed bird netting, allowing maintenance work without removing the netting. Suitable for all types of bird netting, they are ideal for accessing gutters, light fittings, CCTV cameras and plant equipment.

Installation Instructions

1. Position the zip where access is required and secure the fabric edging to the netting using hog ring staples, with one staple per mesh square along both sides.
2. Open the zip and carefully cut the netting threads behind it using netting shears.
3. For larger access points, install two zips in an L-shaped configuration to create a doorway that can be opened and closed as required.

Important: An L-shaped configuration is recommended for access requiring a person to pass through the netting. Using a single zip may place strain on the netting structure and make access difficult.

Width (closed)	35 mm
Length	1 m | 2 m | 3m | 4 m | 5 m
Colour	Black | White | Stone
Components	Box Stop and top stops. External slider single tab.
Component Material	Plastic
Material (tape)	Nylon

Unit 1-3 Cedar Park
