New Storm[®] Ultra Secure

Take them by Storm[®]

Efficient, reliable & cost effective rodent control

Storm[®] Ultra Secure is a 25ppm rodenticide that has the palatability of a pasta in a block, and is at least twice as palatable as leading anticoagulant bait blocks. This single feed bait offers effective control, even against rats and mice with anticoagulant resistance. It can be used in extreme temperatures, has a high resistance to mould and contains no wax which makes it more appealing to rodents. If you need to control rodents, take them by Storm.

- ☑ **Ultra palatable** for rats and mice
- ☑ **Ultra resistant** to extreme conditions
- ☑ **Ultra effective** with just a single feed
- ☑ **Ultra quick control** of rodent infestations
