## JADE CLUSTER GRAIN

### Granular bait containing 0.005%w/w of bromadiolone

Authorisation No: UK-2013-0807

User category: For professional use only Field of use: Indoor and outdoor use (around building only) Application method: In bait stations or other covering Terget organisms: Rattus norvegicus Brown rat; Rattus rattus Roof rat. House rat. Mus musculus House mouse: Other Muridae (Field mouse)

#### Application rate(s) and frequency:

For mice high infestation; up to 30g bait in bait stations or covered bait points every 2 metres, low infestation; up to 30g bait in bait stations or covered bait points every 5 metres. For rats high infestation : up to 100g bait in bait stations or covered bait points every 5 metres, low infestation; up to 100g bait in bait stations or covered bait points every 10 metres. Check bait consumption every few days and replace consumed or spoilt bait until consumption has stopped.

#### Resistance information

The resistance status of the target population should be taken into account when considering the choice of rodenticide to be used.

#### Instructions for use:

Wash hands and exposed skin before meals and after use. Baits must be securely deposited in a way so as to minimize the risk of consumption by other animals or children. Where possible, secure baits so that they cannot be dragged away. Prevent access to bait by children, birds and non-target animals (particularly dogs, cats, pigs and poultry). Unless under the supervision of a pest control operator or other competent person, do not use anticoagulant rodenticides as permanent baits. In most cases, anticoagulant bait should have achieved control within 35 days. Search for and remove dead rodents at frequent intervals during treatment (unless used in sewers), at least as often as when baits are checked and/or replenished. Daily inspection may be required in some circumstances. Dispose of dead rodents in accordance with local requirements. Poisoned rodents may be disposed of by the waste producer at an incinerator or landfill permitted to accept that type of waste, or collected by a registered waste carrier and taken for disposal at a suitably permitted site. For further information on disposal contact the Environment Agency (http://www.environment-agency.gov.uk) or SEPA (http://www.sepa.org.uk).

#### Public area use:

When the product is being used in public areas, the areas treated must be marked during the treatment period and a notice explaining the risk of primary or secondary poisoning by the anticoagulant as well as indicating the first measures to be taken in case of poisoning must be made available alongside the baits. When tamper resistant bait stations are used, they should be clearly marked to show that they contain rodenticides and that they should not be disturbed.

#### Precautionary statements:

Keep out of reach of children Read label before use Keep /store away from food, drink and animal feedingstuffs. Do not eat, drink or smoke when using this product. Avoid release to the environment IF SWALLOWED: Immediately call a poison centre or doctor/physician. Store locked up in a closed container. Dispose of contents/container in accordance with national regulations.

#### Particulars of likely direct or indirect effetcs, first aid instructions and emergency measures to protect the environment.

Bromadiolone is an anticoagulant which may produce bleeding: this may be delayed for several days after exposure. If there is no active bleeding the INR (prothrombin time) should be measured on presentation and 48-72 hours after exposure. If the INR is greater than 4, administer Vitamin K1 (phytomenadione) 5-10 mg by slow intravenous injection (100 µg/kg body weight for a child). Treatment with phytomenadione (orally or intravenously) may be required for several weeks. The advice of the National Poisons Information Service (http://www.npis.org/) should be sought particularly if active bleeding occurs

#### Instruction for safe disposal of the product and its packaging:

Remove all baits after treatment and dispose of them in accordance with local requirements. For information on disposal contact the Environment Agency (http://www.environment-agency.gov.uk) or SEPA (http://www.sepa.org.uk).

#### Conditions of storage:

Store securely.

Store in the original packaging Marketed by LODI UK Limited
