- *Bed bugs hide in cracks, crevices and other small areas of safe harbourage such as between cushions and mattresses, making them hard to detect.*
- *This clear, safe to use, rigid plastic monitoring device slips between mattress and frame, or any place that you want to keep safe.*
- *The proprietary gel attracts and traps bed bugs if they are present.*
- *Each monitor will last up to three months if used in a clean environment.*
- *Use in: hotel/motel rooms, hospital wards, homes, dormitories, nursing homes, luggage racks/stores, cars, buses, lobbies, restaurant or anywhere with carpeting or soft furnishings..*
- *Results are possible within hours, though in most cases it will take several days.*

EASY TO USE

1. **Simply insert the business-card-size Bed Bug ALERT™ monitor between the mattress and box spring/divan, in the corners at the head or the bed, or into any crevice in any suspect area, i.e. under sofa cushions or behind furniture against skirting boards.**
2. **Check the Bed Bug ALERT™ daily and discard immediately in a sealed plastic bin bag should it contain a bed bug.**
3. **If ANY sign of bed bugs is found, contact your pest control service provider IMMEDIATELY to take pesticidal action to control and eliminate infestation immediately.**

TO RE-ORDER

To re-order this product simply contact your pest control service provider or call Bird-X UK & Ireland on +44 (0)1903 715 631. Bed Bug ALERT monitors are sold in Packs of 12 monitors or cases of 144 monitors.
