

CASE STUDY: PIGEON NET

THE PROBLEM

A customer contacted our team after speaking with a sales representative, describing an ongoing pigeon issue in a narrow gap between their home and a neighbour's house. The neighbour had previously installed green mesh, which had since deteriorated and become ineffective. The customer wanted a proper, long-term solution.

The irregular 2m x 4.5m space was enclosed by brick walls and wooden gates. The customer asked if a 5m x 5m, 50mm pigeon net kit would suit and mentioned possibly needing extra corner eye bolts. They were ready to order and offered photos or measurements if needed.

THE SOLUTION

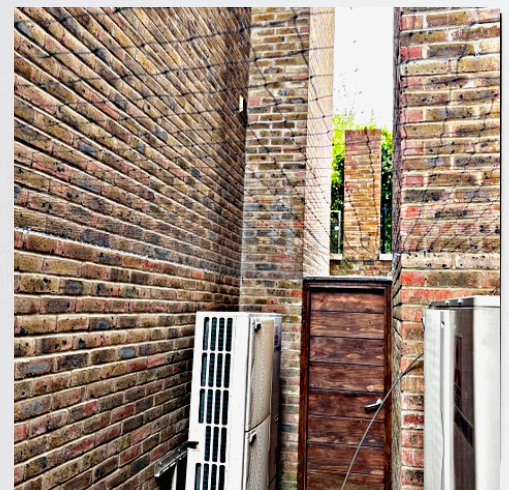

Gemma from our sales team assessed the situation, recommended the most suitable netting, and guided the customer through the purchase process.

THE OUTCOME

The customer followed up with a brief email, expressing how pleased they were with both our service and the quality of the products supplied.
