

Bird Netting – Knotted – 50mm

Product Description: Bird Proof Netting is a high-performance solution designed for durability and longevity in any environment. Made from UV-stabilised, high-density polyethylene fibers, it resists weather extremes, insects, bacteria, and fungi. Chemically inert and unaffected by wide temperature ranges, the netting remains strong and reliable for over 10 years when properly installed.

Knotted mesh construction is heat-treated under tension to prevent slippage and stretched to ensure perfectly square mesh. Invisible joins create a seamless finish, making it unobtrusive and easy to install while maintaining superior strength and durability.

Material	100% Virgin HDPE
Colour	Black/Stone/Translucent
Mesh Size	Square mesh 50mm Sq. /100mm Str. (2")
Weight	21g/sqm
Fibre Thickness	12/1000" (600 Denier / 0.30 mm)
Twine Designation	12/6 Ply
Twists	610–630 per metre
Softening Point	120°C
Melting Point	130°C
UV Protection	1000 Kly
Life Span	8-10 years
Break Strength (twine)	175N
Break Strength (20cm x 20cm)	604N
