

Stainless Steel Glue Board Insect Trap with Innovative LED Tube

Product Description: The PestFix Stainless Steel Glue Board Insect Trap is a sleek, energy-efficient solution for discreet and effective insect control in residential and commercial spaces. Utilising dual-wavelength UV-A LED technology, it attracts flying pests such as flies, mosquitoes, moths, and wasps without chemicals or noise. Its eco-friendly glue board system ensures mess-free operation, trapping insects out of sight for a hygienic environment.

Designed for modern interiors, its space-saving wall-mounted build seamlessly blends with any décor while allowing for quick installation and hassle-free maintenance. With easy-to-replace glue boards and a durable stainless steel construction, it delivers a user-friendly experience, making it an ideal choice for homes, offices, restaurants, hotels, and other indoor spaces.
