**DIRECTIONS FOR USE:**  
Digrain Control One Shot Fogger is an automatic 'one shot' fogging aerosol. Firstly, ensure that all people, animals, pets (including terrariums and aquariums) and foodstuffs are removed from the area to be treated, and firmly close all doors and windows. Place the aerosol on a non-sensitive surface in the middle of the area being treated. Press down nozzle until it locks into position - it will start to automatically dispense the contents. Leave the area immediately and don't re-enter for a minimum of 2 hours to allow the product to work effectively. Once you return to the area, open all doors and windows to ventilate thoroughly (airing between 1 hour to half a day depending on the area being ventilated).
