

INSECTO

**MAXI
SMOKE
BOMB**

User Guide

MAXI SMOKE BOMB

FOR USE ONLY AS AN INSECTICIDE

Ready-to-use insecticidal smoke generators for general disinfection indoors. The insecticidal smoke will control insects present at the time of treatment by direct contact action (space treatment).

FLYING INSECTS

For the control of flying insects e.g. houseflies, cluster flies, mosquitoes, wasps and moths.

CRAWLING INSECTS

Aids the control of crawling insects e.g. fleas, bed bugs, ants, cockroaches and stored product insects, e.g. Saw toothed grain beetles and adult grain weevils.

RATES OF APPLICATION

Crawling insects:	Fleas and bed bugs	One maxi generator treats 250 m ³ .
	Ants, cockroaches etc	One maxi generator treats 62.5 m ³ .
Flying insects:		One maxi generator treats 1000 m ³ .

DIRECTIONS FOR USE

Insecto Maxi Smoke Bomb may be used in the following situations:

Domestic:	Private housing
Food Handling:	
Processing:	Food manufacture, kitchens, slaughterhouses etc.
Storage:	Food retailers, warehouses, raw material stores etc.
Preparation:	Restaurants, commercial kitchens etc.

PUBLIC HYGIENE AREAS

Hospitals (not occupied wards), hotels, public baths, industrial and municipal buildings, churches, halls, community centres, cinemas etc.

SMALL ANIMAL HOUSING

Zoos, pet shops, kennels, veterinary practices, laboratory animal houses etc., excluding animal pens and cages.

Not for use on grain or in empty grain stores.

Remove/Cover processed foodstuffs, utensils and food preparation equipment.

Cover unprocessed foodstuffs. Seal area to be treated as effectively as possible.

Close doors and windows block fireplaces and exclude draughts. Clear people, plants and animals including fish from the area to be treated.

Place each smoke generator on a fireproof base of approximately 300 mm x 300 mm but NOT in a bucket or other enclosed space.

Take the required number of smoke generators. Tear off tag and remove container cap. When a number of smoke generators are being used, space them throughout the area to be treated, and prepare all for ignition before lighting the first.

Light the igniter using a match. Do not leave lighted match on generator.

Light smoke generators in sequence, starting with the furthest from an identified exit. Leave for not less than two hours or one hour per 1.5 m ceiling height. After treatment is complete, open windows and doors and ventilate thoroughly.

The product may be used to treat empty bins and stores, or spaces where unprocessed foodstuffs are protected from deposits of the insecticide by means of a covering not more permeable than twill jute sacking.

FLEA CONTROL

Where infestations are associated with domesticated animals, the animals should be treated using a suitable veterinary product. Thorough cleaning of the premises will also contribute to flea control and reduce the opportunity for further infestation.

BED BUG CONTROL

Thorough cleaning, including laundering of bedding will assist the control of bed bug infestations.

WARNINGS

Do not apply smoke in the presence of plants.

Ventilate treated areas thoroughly after treatment.

Do not disturb bats or their roosts. This may influence the use of Insecto Maxi Smoke Bomb in roof spaces etc. No treatment should be made without first ascertaining whether bats use the site as a roost. All bats are protected under the Wildlife and Countryside Act (1981) or the Wildlife (Northern Ireland) order (1985). Before treating any structure used by bats, consult English nature, Scottish Natural Heritage, The Countryside Council for Wales or Department of the Environment for Northern Ireland.

PRECAUTIONS

WASH HANDS AND EXPOSED SKIN before meals and after use.

Keep out of reach of children.

KEEP IN A SAFE PLACE

Avoid contact with skin.

Use appropriate containment to avoid environmental contamination.

To avoid risks to man and the environment, comply with the instructions for use.

Safety data sheet available for professional user on request.
