

Insecticide for professional use as a surface spray for the control of flying and crawling insects such as bedbugs, fleas, cockroaches, beetles, flies, mosquitoes, moths and wasps. For use on surfaces where insects may rest (including cracks and crevices) in domestic, public and industrial premises, hospitals (not occupied wards) and military establishments.

Directions for use:

Add a small quantity of water to a suitable compression sprayer and then add product according to the table below. Add the remainder of the water, close the sprayer securely, shake to mix contents. Pressurise according to the sprayer manufacturer's instructions. One litre of ready-for-use spray treats 20 square metres of surface. Make up spray as required. Do not store spray overnight.

TARGET PEST	PRODUCT	WATER	COMMENTS
CRAWLING INSECTS <i>Routine treatment:</i> <i>Heavy infestation:</i>	25ml 50ml	5 litres 5 litres	Maintenance / spot treatment Attack / clean-out treatment
FLYING INSECTS <i>Routine treatment:</i>	25ml	5 litres	For the control of resting insects

Apply as a coarse low pressure spray. Some surfaces will absorb more spray, e.g. brickwork or concrete, whereas surfaces such as metal or plastic will allow spray to easily 'run off' significantly reducing the deposit rate of the active material on the surface. Several passes of a light spray each allowed to dry is more effective when treating non-porous surfaces.

Crawling insects: Spray around and behind fixtures and fittings or as a 'barrier' treatment around doors and windows.

'Resting' flying pests: Apply to areas and surfaces where flying pests are seen to rest.

To avoid risks to man and the environment, comply with the instructions for use. The (COSHH) Control of Substances Hazardous to Health Regulations 2002 may apply to the user of this product at work. Avoid excessive contamination of coveralls. Do not contaminate foodstuffs, eating utensils or food contact surfaces. This material and its container must be disposed of in a safe way. Unprotected persons and animals should be kept away from treated areas until surfaces are dry. All bats are protected under the wildlife and countryside act 1981. Before treating any structure used by bats consult Natural England, Scottish Natural Heritage or the Countryside Council for Wales. Hazardous to bees. Action should be taken to prevent foraging bees gaining access to treated nests, preferably by removing the combs or blocking the nest entrance. Do not apply directly to animals. Do not apply to clothing or bedding. Not to be used on pet bedding, pet sleeping quarters or where pets frequently/normally lie. Wash hands and exposed skin before meals and after use. Keep in a safe place. Do not touch treated surfaces until dry.
