Technical Data Sheet

## MoBe Ant Station

### DESCRIPTION

MoBe Ant Stations are a pre-baited station containing insecticidal gel for the control of Tropical Ants, Argentine Ants and Black Garden Ants indoors and outdoors. The gel contained within the secure station is effective against all life stages, being passed on by workers who have collected gel to other individuals within the nest (including larvae, queens and eggs). MoBe Ant Stations are also approved for amateur use and can be provided to non-professionals such as home owners.

### SPECIFICATION

**Active:** Imidacloprid (0.01%)

**Shelf Life:** 24 months

**Colour:** Green

**Commodity Code:** 38089190

**UN Number:** N/A

**Shipping Incoterms:** Ex Works-Bristol

1.4g

<b>Minimum Order</b>	<b>15 x 1.4g</b>
<b>Dimensions</b>	<b>H: 63cm W:56cm L:226cm</b>
<b>Weight</b>	<b>15pack: 194 g</b>

#### DIRECTIONS FOR USE

Each station should be placed along/in the path of an established foraging trail at the recommended rate. Push tabs outwards to expose bait. To ensure that pets or other animals do not gain access, a heavy object such as a stone may be placed on top of the station. Once the infestation has been controlled and ants are no longer seen, the opened stations should be removed and disposed of in accordance with local guidelines.

#### SAFETY INFORMATION

**Do not ingest. Misuse may cause health damage. Keep away from food, drink and animal feed. Do not contaminate food, feed, eating utensils or food preparation surfaces. Keep out from reach of children and pets. Avoid release to the environment. The outdoor application should only be conducted on paved surfaces (do not apply on bare soil). Remove stations when treatment is completed and dispose of appropriately.**

**USE BIOCIDES SAFELY. ALWAYS READ THE LABEL.**
