

Hockley International Limited

making a world of difference

8th September 2026

Dear Valued Customer,

I am writing to inform you of an important change regarding the regulatory status of Permost CS. As you may be aware, we have been working closely with the product manufacturers to secure national approval under the GB Biocidal Products Regulation (GB BPR).

Despite significant investment in preparing a comprehensive dossier and supporting trial data, the Health and Safety Executive (HSE) has advised that the application would be rejected without the completion of several additional studies and/or substantial label amendments.

Having carefully considered the implications of these requirements, particularly the proposed label restrictions which we believe would limit several essential uses of the product, we have taken the difficult decision not to proceed with the application.

As a result, Permost CS has now entered its withdrawal period. The product may continue to be sold and supplied until **1 March 2027** and used until **2 September 2027**.

We recognise this may be disappointing news and share that disappointment given the considerable time, effort, and investment dedicated to maintaining the availability of this highly effective product. However, we are pleased to be developing and launching new products in the coming months and will keep you informed of these developments.

In the meantime, we would like to thank you for your continued support and valued partnership over the years.

Best regards,
Peter Rosevere
