& German Railways rely on it

### CUSTOMER-APPROVED

over 3,000+ 5-star reviews  
on Amazon.com & 10,000+ in Europe

# SUPER NINJA EXPLAINED

## Why are the traps so effective?

It's all in the design! A powerful non-toxic attractant, escape-proof funnel, and adhesive backing keep fruit flies trapped right at the source.

## What's in the attractant?

A safe, food-grade mix of vinegar, apple concentrate, and a touch of dish soap (SLS)—the same ingredient that makes toothpaste foam.

## Are the traps food-grade?

Yes! 100% toxin-free and safe for use near food.

## How long does one trap last?

Replace every 3 to 4 weeks for best results. What's the shelf life? Unopened traps last 2 years—expiration date printed on the back.

## Has the product been lab-tested?

Yes! An independent lab found that 97.3% of fruit flies were caught within 24 hours in a controlled test.

## Is it EPA-compliant?

Yes! The active ingredient Sodium Lauryl Sulfate (SLS) is a minimum risk pesticide, exempt from EPA registration under FIFRA sec. 25(b).

## HOW TO USE IT

1

Shake the bottle

2

Open the cap

3

Swipe the funnel clean

4

Stick or place it near source

5

Simple, safe, super effective

## Specifications

The Super Ninja Fruit Fly traps for professionals are packed in a master case with 45 Pro-packs. Each Pro-pack consists of 12 bottles.

## Product Dimensions

Individual Bottle: 1.3"×1.1"×2.1"
