

Technical Specification

Angle Brackets (L-Brackets) : Intermediate Fixing

SKU: NF187

Product Description

PestFix Angle Brackets (L-Brackets) are designed to provide strong, reliable right-angle support for intermediate fixing applications. They are suitable for use in construction, pest-proofing installations, joinery, and general building projects where additional reinforcement or secure corner fixing is required.

Key Features:

- Rigid L-shaped design for right-angle support.
- Pre-drilled fixing holes for easy installation.
- Suitable for intermediate load-bearing application.
- Compatible with wood, masonry, and metal substrates (fixings not included).
- Corrosion-resistant finish for durability in indoor and outdoor environments

Material:

- Steel construction.
- Protective zinc-plated or galvanised finish (variant dependent).

Typical Applications:

- Timber framing and joinery.
- Pest-proofing installations (mesh and barrier support).
- Shelving, brackets, and framework reinforcement.
- General building and maintenance work.
