## X-Trap 50 Replacement Glue Boards

**SKU:** FK241

### Product Description

The X-Trap 50 Replacement Glue Boards are designed for use with the X-Trap 50 and X-Trap 50 LED insect light traps. Each board features a strong, high-tack adhesive surface with a printed monitoring grid, making it easy to capture and record flying insect activity. Manufactured from durable materials with a temperature-resistant glue, these boards provide reliable performance in a wide range of environments, including food preparation, retail, and commercial premises.

Supplied in packs of 10, the boards are simple to install via the unit's glue rail system and should be replaced regularly to maintain optimum fly control and hygiene standards.

### Usage / Maintenance

- Replace glue boards regularly or when visibly full of insects/dust
- Frequency: typically every 4-6 weeks in high-risk areas
- Always use genuine replacement boards for best fit and performance

Attribute	Specification
