

### PREPARING SURFACES FOR TREATMENT

It is essential to clean the application site of all nests, faeces and other organic debris before *Bird Free* is applied. (Failure to do so will compromise efficacy.) Routine cleaning of droppings where there are no nests or major accumulation of faeces (e.g. from window cills) can be done with scrapers and wire brushes. Simple precautions to reduce direct contact with droppings, such as wearing disposable gloves and clothes that can be washed, should be taken. When cleaning long-standing nesting or night roosting sites where there is a major accumulation of faeces, full PPE, including masks, should be worn. Precautions should be taken to ensure that members of the public are not exposed to airborne dust or other debris. Surfaces should be cleaned with suitable cleaning agent where faeces are present to limit generation of airborne dust and aerosol mists during cleaning. If a pressure washer is used, dust and aerosol control measures, such as containing the area with plastic sheeting, should be taken. Alternatively, the wetted faeces and debris can be removed with a shovel. The wet material should be collected in heavy-duty plastic bags, or some other type of secure container, and discarded with rubbish. Allow cleaned surfaces to dry fully prior to treatment.

### APPLICATION DIRECTIONS

Affix pre-packed covered plastic dishes to dry surfaces with silicone adhesive and remove covers from dishes. For pigeons, dishes should be spaced (centre-to-centre) as follows: nesting sites 14-15cm; night roosts 14-20cm; day roosts 18-25cm. *Bird Free* will remain effective for a minimum period of 3 months. Safety Data Sheet available on request.

### STORAGE

Store in a well-ventilated place in original container. Keep in a safe place inaccessible to children and pets. Do not store near food or feed. Do not store in an environment which will corrode the plastic dishes. Shelf life: 12 months.

### DISPOSAL

Waste resulting from the use of this product may be disposed of appropriately on site or at an approved waste disposal facility. Do not contaminate water, food or feed by storage and disposal. Never place unused product down any indoor or outdoor drain. Ensure any exposed gel in dishes is covered to prevent spreading or contamination prior to disposal. This material and its container must be disposed of in a safe way. Dispose of contents/ container in accordance with local regulations.

### CLEAN-UP

When replacing or removing, remove plastic dishes and clean surfaces with a disposable cloth soaked in soap and water. Avoid touching the gel when removing the dishes. See above for disposal of waste.

### OTHER

Product Type: PT19: Repellents and attractants. For use only as a repellent. The COSHH Regulations 2002 (as amended) apply to the use of this product at work. Fifteen dishes of *Bird Free* (round PET dishes with cover) are packed into this cardboard box.
