

## CASE STUDY:

# GUANOFIX PLUS DISINFECTANT

BEFORE VS AFTER

## THE CHALLENGE

Staff at a busy builders' merchant were dealing with persistent accumulations of bird droppings on solid concrete flooring, particularly in high-traffic loading areas and alongside warehouse walls. The guano buildup posed both hygiene risks and slip hazards, requiring frequent manual cleaning with limited success.

## THE SOLUTION

The Vergo Pest Management team utilised GuanoFix Plus Disinfectant from PestFix. This is a concentrated liquid disinfectant, specially formulated to control pathogens and microorganisms commonly found in bird faeces. The product was diluted with water and applied via a backpack sprayer to ensure even coverage and ease of use across large surface areas.

## THE RESULT

Surfaces were left visibly cleaner, with minimal scrubbing needed after treatment. The product's ability to soften hardened droppings and suppress dust improved both the effectiveness and safety of the cleaning process. Ryan Davidson, Pest Control Technician at Vergo Pest Management Ltd, noted: "Using GuanoFix in a sprayer diluted into water works an absolute treat. It softens up the guano which makes it 10x easier to remove with a wire brush, and it knocks down any dust too. It's definitely made our cleaning routine faster and more effective."
